SIZING: Measure around thigh 4" above the patella.

HOW TO APPLY:

Place the immobilizer behind knee using the contoured posterior stays as a guide for proper positioning. The inverted portion of the stays should be placed in the popliteal area (directly behind the knee). The medial and lateral stays should be aligned with the side of the leg. Wrap the sides of the immobilizer around and close in front. Secure straps immediately above and below the patella first. Work from the bottom upwards, closing the additional straps. Excess strap length may be trimmed to fit. Adjust if necessary.

CARE INSTRUCTIONS:

Hand wash in cold water with mild soap. Wrap in a towel to remove excess water (do not twist or wring). Air dry away from heat. Do not tumble dry. Do not bleach.

CAUTION:

Wear as recommended. Always consult a physician when encountering persistent pain, discomfort, inflammation, or swelling.
